LANGUAGES & PROJECTS

Software Skills:

- Linux
- C
- Java
- HTML
- CSS
- Scheme
- Microsoft Office

Projects:

- Implemented my knowledge from online Courses and resources to successfully create a scientific calculator and a unit converter
- Keeping Up: Gives users reminders, updates to-do lists and displays classrooms and office hours. Created using Java.

EXPERIENCE

Senior I.T Intern, Arabian Construction Company
June 2013 – September 2015

- Participated on the IT and Telecommunication teams over a period of two summers, to help implement software updates to the internal Oracle Financials software and Inventory Control projects, which increased efficiency by 12%.
- Enhanced my teamwork and technical skills through effectively working with a team of engineers on a special project with Kuwait's Ministry of Communications; providing mobile network solutions by implementing radio networks distributed over cells or base stations.

Senior Delegate, MUN (Model United Nations)
September 2014 – June 2015

- Successfully led the Kuwait team during live debates regarding solving worldwide economic, social, political and cultural issues that were presented.
- Developed my critical thinking, research and writing skills through group discussions throughout the debate.

Mentorship/Teacher assistant, Kuwait English School
September 2013 – June 2015

- Tutored 13 high school students on technology and computing related courses and questions.
- Analyzed midterm marks with final exams' marks, and found a 35% increase in the students' results.

AWARDS

- Presidential Scholarship for entrance average above 97%, University of Waterloo, Waterloo, Ontario. *September 2015*
- Valedictorian, Kuwait English School, Salwa, Kuwait. *September 2014*
